DETAILED ACTION

Drawings

1. The drawings are objected to because all black boxes in figure 1 need text labels; the timing circuitry (260) is not labeled in Figure 2; the examiner cannot determine which elements of the drawings form the timing circuitry 255 (and 260) due to unclear labeling. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 1, 2 and 4-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

With respect to claim 1 line 10, the recited "tap delay line for delaying the system clock" is unclear because the tap delay line (Figure 2, 204) does not receive the system clock (Figure 2, 200).

With respect to claim 1 (lines 2,5,6, 8 and 11) the recited "clock signal" is unclear because it fails to point out if the clock signal is referring to the output clock signal, the flip flop clock signal or the system clock signal.

With respect to claim 1 line 11, the recited "signal" is unclear as to whether the signal is referring to the first signal in line 5 or the second signal in line 6.

With respect to claim 1 line 13, the recited "output" is unclear if the output is coming from the first signal or the second signal.

Allowable Subject Matter

4. Claims 1, 2 and 4-7 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.
5. Claims 8-16 and 18-23 are allowed.
